

Subject Index

Abatement and removal

- Cell Immobilized FOG-Trap System for Fat, Oil, and Grease Removal from Restaurant Wastewater, 674
- Dosage Control of the Fenton Process for Color Removal of Textile Wastewater Applying ORP Monitoring and Artificial Neural Networks, 608
- Effect of the Presence of Chromium (III) on the Removal of Lead (II) from Aqueous Solutions by Agricultural Wastes, 726
- Flexible Operation of Coal Fired Power Plants with Postcombustion Capture of Carbon Dioxide, 624
- Imperviousness and Land-Use Policy: Toward an Effective Approach to Watershed Planning, 1075
- Removal of Copper Ions from Waters Using Surfactant-Enhanced Hybrid PAC/MF Process, 599
- Removal of Cs^+ and Co^{2+} from Domestic Wastewater by Adsorbent Addition, 1926
- Removal of Zn^{2+} from Electroplating Wastewater Using Modified Wood Sawdust and Sugarcane Bagasse, 610
- Retrofitting of an Industrial Chemical Scrubber into a Biotrickling Filter: Performance at a Gas Contact Time below 1 s, 612
- Thermal Removal of Mercury in Spent Powdered Activated Carbon from TOXECON Process, 692
- Transport of Colloids and Associated Hydrophobic Organic Chemicals through a Natural Media Filter, 574
- Use of Phosphate Rock for the Removal of Ni^{2+} from Aqueous Solutions: Kinetic and Thermodynamics Studies, 600

Absorption

- Performance of a Rollover Protective Structure for a Bulldozer, 430
- Potential for Carbon Dioxide Absorption in Concrete, 626
- Static and Fatigue Behavior of Thick Pultruded GFRP Plates with Surface Damage, 117

Acceleration

- Acceleration and Skewness Effects on the Instantaneous Bed-Shear Stresses in Shoaling Waves, 1902
- Aggregate Fuel Consumption Model of Light-Duty Vehicles for Evaluating Effectiveness of Traffic Management Strategies on Fuels, 1758
- Comparative Evaluation of Base-Isolated and Fixed-Base Buildings Using a Comprehensive Response Index, 1595

Accident prevention

- Cognitive Approach to Construction Safety: Task Demand-Capability Model, 360
- Psychosocial Factors and Musculoskeletal Disorders in the Construction Industry, 293
- Safety as an Emergent Property: Investigation into the Work Practices of High-Reliability Framing Crews, 307

Accidents

- Case-Based Reasoning for Construction Hazard Identification: Case Representation and Retrieval, 390
- Development of a Probabilistic Timing Model for the Ingestion of Tap Water, 1862

From Normal Operation to Evacuation: Single-Vehicle Safety under Adverse Weather, Topographic, and Operational Conditions, 1917

Human Factors Analysis Classification System Relating to Human Error Awareness Taxonomy in Construction Safety, 346

Identification and Analysis of Factors Affecting Safety on Construction Sites with Tower Cranes, 270

Review of Regulations and Guides for Excavation and Trenches—Comparison with the Québec Safety Code for the Construction Industry, 1980

Steel Erection Fatalities in the Construction Industry, 289

Accuracy

- Accuracy of Predictive Models for Dynamic Modulus of Hot-Mix Asphalt, 1389
- Evaluation of a Moderate Resolution, Satellite-Based Impervious Surface Map Using an Independent, High-Resolution Validation Data Set, 1069
- Model for the 3D Location of Buried Assets Based on RFID Technology, 237
- Network Calibration for Unfavorable Reference-Rover Geometry in Network-Based RTK: Ohio CORS Case Study, 1686

Acids

- Probing pH Levels in Civil Engineering Materials, 1359
- Sequential Electrokinetic Remediation of Mixed Contaminants in Low Permeability Soils, 687

Acoustic techniques

- Airborne Acoustic Method to Determine the Volumetric Water Content of Unsaturated Sands, 914
- Creep-Damage Coupled Effects: Experimental Investigation on Bending Beams with Various Sizes, 1361
- Design and Field Evaluation of Hybrid FRP/Reinforced Concrete Superstructure System, 137
- Experimental Characterization and Optimization of Hybrid FRP/RC Bridge Superstructure System, 112
- Global Monitoring of Large Concrete Structures Using Acoustic Emission and Ultrasonic Techniques: Case Study, 125
- Investigation of Two Elemental Error Sources in Boat-Mounted Acoustic Doppler Current Profiler Measurements by Large Eddy Simulations, 1008
- Mean Flow and Turbulence around a Laboratory Spur Dike, 1001

Activated carbon

- Axial Dispersion and Mass Transfer Controlled Simulation Study of Chromium (VI) Adsorption onto Tree Leaves and Activated Carbon, 696
- Capacity of Activated Carbon Derived from Peach Stones by K_2CO_3 in the Removal of Acid, Reactive, and Direct Dyes from Aqueous Solution, 609
- Dynamic Modeling of Bentazon Removal by Pseudo-Moving-Bed Granular Activated Carbon Filtration Applied to Full-Scale Water Treatment, 598
- Equilibrium and Kinetic Study on Reactive Dyes Adsorption by Palm Kernel Shell-Based Activated Carbon: In Single and Binary Systems, 732

Hydraulic Conductivity and Compressibility of Soil-Bentonite Backfill Amended with Activated Carbon, 795

Modeling of Adsorption and Regeneration of Volatile Organic Compounds on Activated Carbon Fiber Cloth, 729

Multicomponent Sorption of Pyridine and Its Derivatives from Aqueous Solution onto Rice Husk Ash and Granular Activated Carbon, 1951

Predicting Minimum Carbon Usage for PAC Adsorption of Trace Organic Contaminants from Natural Water, 709

Relative Impact on GAC Usage Rates of Operating Strategies for Treatment of Contaminated Groundwater, 10

Removal of Copper Ions from Waters Using Surface-Enhanced Hybrid PAC/MF Process, 599

Sorptive and Reactive Scavenger-Containing Sandwich Membranes as Contaminant Barriers, 577

Thermal Removal of Mercury in Spent Powdered Activated Carbon from TOXECON Process, 692

Activated sludge

Modeling Risk of Failure in Nitrification: Simple Model Incorporating Abundance and Diversity, 648

Active control

Direct Adaptive Neurocontrol of Structures under Earth Vibration, 266

Quantitative Comparison of Optimization Approaches for the Design of Supplemental Damping in Earthquake Engineering Practice, 1559

Adhesives

Novel Technique for Inhibiting Buckling of Thin-Walled Steel Structures Using Pultruded Glass FRP Sections, 217

Performance of Roof Tiles under Simulated Hurricane Impact, 95

Predicting the Environmental Lifetime of Adhesive Joints under Laboratory Conditions, 1434

Simplified Impedance Model for Adhesively Bonded Piezo-Impedance Transducers, 82

Tests of Adhesives to Augment Nails in Wind Uplift Resistance of Roofs, 1536

Adsorption

Axial Dispersion and Mass Transfer Controlled Simulation Study of Chromium (VI) Adsorption onto Tree Leaves and Activated Carbon, 696

Capacity of Activated Carbon Derived from Peach Stones by K_2CO_3 in the Removal of Acid, Reactive, and Direct Dyes from Aqueous Solution, 609

Different Approaches for the Development of Low-Cost CO_2 Adsorbents, 621

Dynamic Modeling of Bentazon Removal by Pseudo-Moving-Bed Granular Activated Carbon Filtration Applied to Full-Scale Water Treatment, 598

Effect of the Presence of Chromium (III) on the Removal of Lead (II) from Aqueous Solutions by Agricultural Wastes, 726

Equilibrium and Kinetic Study on Reactive Dyes Adsorption by Palm Kernel Shell-Based Activated Carbon: In Single and Binary Systems, 732

Modeling of Adsorption and Regeneration of Volatile Organic Compounds on Activated Carbon Fiber Cloth, 729

Multicomponent Sorption of Pyridine and Its Derivatives from Aqueous Solution onto Rice Husk Ash and Granular Activated Carbon, 1951

Numerical Study of Bromide as a Tracer for Aquifer Macrodispersivity Tests: Comparing Conservative Behavior to Mildly Nonlinear Adsorption, 1177

Parametric Evaluation of Batch Equilibria for Storm-Water Phosphorus Adsorption on Aluminum Oxide Media, 658

Predicting Minimum Carbon Usage for PAC Adsorption of Trace Organic Contaminants from Natural Water, 709

Removal of Zn^{2+} from Electroplating Wastewater Using Modified Wood Sawdust and Sugarcane Bagasse, 610

Sorption Behavior and Mechanism of Pb(II) on Chinese Loess, 576

Storm-Water Filter Media Pollutant Retention under Aerobic versus Anaerobic Conditions, 613

Theoretical Soil-Water Characteristic Curves Based on Adsorption, Cavitation, and a Double Porosity Model, 39

Thermal Removal of Mercury in Spent Powdered Activated Carbon from TOXECON Process, 692

Advection

Analysis of Virus Transport in Groundwater and Identification of Transport Parameters, 1936

Aeration

Energy Concept for Predicting Hydraulic Jump Aeration Efficiency, 582

Influence of Selected Operating Parameters on Fungal Biomass Production in Corn-Ethanol Wastewater, 699

Kinetic Energy Approach to Dissolving Axisymmetric Multiphase Plumes, 1024

Oxygen Transfer in High-Speed Surface Aeration Tank for Wastewater Treatment: Full-Scale Test and Numerical Modeling, 651

Performance Evaluation of Double-Hub Paddle Wheel Aerator, 637

Resistance Characteristics of Surface Aerators, 929

Aerial surveys

Analysis and Evaluation of Various Tropospheric Modeling Approaches for High-Precision GPS Kinematic Positioning over Medium Ranges and at High Altitude: Case Study, 1683

Flight Optimization Algorithms for Aerial LiDAR Capture for Urban Infrastructure Model Generation, 250

Improved Approach to LIDAR Airport Obstruction Surveying Using Full-Waveform Data, 1684

Use of Airborne and Terrestrial Lidar to Detect Ground Displacement Hazards to Water Systems, 1688

Aerobic treatment

Estimation of Sequential Degradation Rate Coefficients for Chlorinated Ethenes, 1930

Simultaneous Nitrogen and Phosphorus Removal from High-Strength Industrial Wastewater Using Aerobic Granular Sludge, 588

Storm-Water Filter Media Pollutant Retention under Aerobic versus Anaerobic Conditions, 613

Aerodynamics

Anatomy of Turbulence Effects on the Aerodynamics of an Oscillating Prism, 521

Design of a Static Thruster for Microair Vehicle Rotorcraft, 52

Evaluation of Quasi-Steady Theory Applied to Windborne Flat Plates in Uniform Flow, 490

SUBJECT INDEX

Aging

- Membrane Micro Air Vehicles with Adaptive Aerodynamic Twist: Numerical Modeling, 61
- Oscillation Susceptibility Analysis along the Path of the Longitudinal Flight Equilibria in ADMIRE Model, 87
- Aeroelasticity**
 - Analytical Solution of the Possio Integral Equation for the Sonic Case, 88
 - Anatomy of Turbulence Effects on the Aerodynamics of an Oscillating Prism, 521
 - Comprehensive Modeling of Shape Memory Alloy Material Response Using a Multimechanism-Based Inelastic Model, 89
 - Toward an Improvement in the Identification of Bridge Deck Flutter Derivatives, 500
- Aerospace engineering**
 - Analytical Solution of the Possio Integral Equation for the Sonic Case, 88
 - Application of Optical Measurement Techniques to Supersonic and Hypersonic Aerospace Flows, 83
 - Assignment of Geometrical and Physical Parameters for the Confinement of Vibrations in Flexible Structures, 85
 - Asymptotic Approach to Free Beam Vibration Analysis, 91
 - Autopilot for Reconfigurable Flight Control System, 51
 - Comprehensive Modeling of Shape Memory Alloy Material Response Using a Multimechanism-Based Inelastic Model, 89
 - Computer Modeling for the Complex Response Analysis of Nonstandard Structural Dynamics Problems, 77
 - Continuum Modeling and Discrete Element Simulations of Elastic-Quasi-Static Granular Flow in a Compressing Slot, 86
 - Design Futures: *Pop-I* Method for Long-Range Planning of Design Organizations, 1339
 - Investigation of the Influence of Pseudoinverse Matrix Calculations on Multibody Dynamics Simulations by Means of the Udwadia-Kalaba Formulation, 81
 - Methodology for Impact Modeling of Triaxial Braided Composites Using Shell Elements, 75
 - Near-Earth Object Threat Mitigation Using a Tethered Ballast Mass, 92
 - Nondetection, False Alarm, and Calibration Insensitivity in Kurtosis- and Pseudofractal-Based Singularity Detection, 93
 - Oscillation Susceptibility Analysis along the Path of the Longitudinal Flight Equilibria in ADMIRE Model, 87
 - Overview of the National Aeronautics and Space Administration Subsonic Rotary Wing Aeronautics Research Program in Rotorcraft Crashworthiness, 66
 - Relative Periodic Motion of a Rigid Body Pendulum on an Ellipse, 50
 - Simplified Impedance Model for Adhesively Bonded Piezo-Impedance Transducers, 82
 - Thermal Buckling Analysis of SMA Fiber-Reinforced Composite Plates Using Layerwise Model, 79
- Africa**
 - Agricultural Risk Decision Support System for Resource-Poor Farmers in Burkina Faso, West Africa, 1854
 - Case Study: Hydraulic Modeling of Runoff Processes in Ghanaian Inland Valleys, 978
 - Characterization of Groundwater Contamination Using Factor Analysis in the Niger Delta (Nigeria), 1162
 - Chinese Contractors in Africa: Home Government Support, Coordination Mechanisms, and Market Entry Strategies, 392
 - Simulating Water Management and Supply Effects at the Office du Niger Collective Canal Irrigation Scheme, 1230
 - Statistical — Dynamical Approach for Streamflow Modeling at Malakal, Sudan, on the White Nile River, 1049
 - Unethical Practices in Nigerian Engineering Industries: Complications for Project Management, 1335
- Aggregates**
 - Application of Microcalorimeter to Characterize Adhesion between Asphalt Binders and Aggregates, 1383
 - Carbonated Ladle Slag Fines for Carbon Uptake and Sand Substitute, 1437
 - Corrosion of Glasses and Expansion Mechanism of Concrete Containing Waste Glasses as Aggregates, 1420
 - Development of Dilatometer Test Method to Measure Coefficient of Thermal Expansion of Aggregates, 1452
 - Effect of Particle Density on Its Rebound in Dry-Mix Shotcrete, 1360
 - Effectiveness of Fly Ash and Slag in Mitigating Alkali-Silica Reaction Induced by Deicing Chemicals, 1356
 - Energy and Greenhouse Gas Emissions Trade-Offs of Recycled Concrete Aggregate Use in Nonstructural Concrete: A North American Case Study, 1216
 - Investigation of a Pavement Premature Failure on a Weak and Moisture Susceptible Base, 1489
 - New Mixture Proportioning Method for Concrete Made with Coarse Recycled Concrete Aggregate, 1429
 - Nonlinear Pavement Foundation Modeling for Three-Dimensional Finite-Element Analysis of Flexible Pavements, 34
 - Porosity of the Dominant Aggregate Size Range to Evaluate Coarse Aggregate Structure of Asphalt Mixtures, 1358
 - Selecting Construction Measures for Mitigating Early-Age Delamination in CRC Pavements Made with Gravel Aggregates, 1754
 - Shear Behavior of Reinforced Concrete Beams Made with Sedimentary Lightweight Aggregate without Shear Reinforcement, 1446
 - Size Influence of Specimens and Maximum Aggregate on Dam Concrete: Compressive Strength, 1397
 - Swelling Characteristic of Bentonite on Pelletization and Properties of Fly Ash Aggregates, 1426
 - Value Addition of Wastewater Sludge: Future Course in Sludge Reutilization, 1932
- Aging**
 - Calculation of Moisture Distribution in Early-Age Concrete, 509
 - Characterization of Recycled Aged RAP Binders Containing Crumb Rubber Modifier Using Gel Permeation Chromatography, 1402
 - Compressive Behavior of Granite: Experimental Approach, 1416
 - Correcting Liquefaction Resistance for Aged Sands Using Measured to Estimated Velocity Ratio, 802
 - Durability of GFRP Reinforcing Bars Embedded in Moist Concrete, 171

- Experimental Characterization of Dynamic Property Changes in Aged Sands, 756
- Improved Representation of Water Age in Distribution Networks to Inform Water Quality, 1860
- Nondestructive and Noncontacting Testing of Hardened Mortar Specimens Using a Free-Space Method, 1414
- Permeation of BTEX through Unaged and Aged HDPE Geomembranes, 842
- Prediction of Aging Characteristics in Natural Rubber Bearings Used in Bridges, 119
- Selecting Construction Measures for Mitigating Early-Age Delamination in CRC Pavements Made with Gravel Aggregates, 1754
- Testing of Hygrothermally Aged E-Glass/Epoxy Cylindrical Laminates Using a Novel Fixture for Simulating Internal Pressure, 197
- Updated Liquefaction Resistance Correction Factors for Aged Sands, 895
- Agreements and treaties**
- Comprehensive Transboundary Water Quality Management Agreement, 2045
- Agricultural wastes**
- Effect of the Presence of Chromium (III) on the Removal of Lead (II) from Aqueous Solutions by Agricultural Wastes, 726
- Agriculture**
- Agricultural Risk Decision Support System for Resource-Poor Farmers in Burkina Faso, West Africa, 1854
- Assessing the Effects of Historical Land Cover Changes on Runoff and Low Flows Using Remote Sensing and Hydrological Modeling, 1090
- Effect of Preharvest Deficit Irrigation on Second Crop Watermelon Grown in an Extremely Hot Climate, 1242
- Effects of Different Levels of Irrigation Water Salinity and Leaching on Yield and Yield Components of Wheat in an Arid Region, 1227
- Estimation of Crop Coefficients Using Satellite Remote Sensing, 1293
- Generalized Analytical Solutions for Groundwater Head in a Horizontal Aquifer in the Presence of Subsurface Drains, 1261
- Including Source-Specific Phosphorus Mobility in a Nonpoint Source Pollution Model for Agricultural Watersheds, 573
- Irrigation Scheduling—Role of Weather Forecasting and Farmers' Behavior, 1858
- New Methodology for the Risk Analysis and Economic Impact Assessment of Agricultural Droughts, 1298
- Operative Approach to Agricultural Drought Risk Management, 1299
- Prototype Geographic Information System for Agricultural Water Quality Management Using CropSyst, 1231
- Relationship between the Storage Coefficient and the Soil-Water Retention Curve in Subsurface Agricultural Drainage Systems: Water Table Drawdown, 1259
- Reservoir Operation and Water Allocation to Mitigate Drought Effects in Crops: A Multilevel Optimization Using the Drought Frequency Index, 1868
- Safety as an Emergent Property: Investigation into the Work Practices of High-Reliability Framing Crews, 307

Simulating Water Management and Supply Effects at the Office du Niger Collective Canal Irrigation Scheme, 1230

Strengths, Weaknesses, Opportunities, and Threats for Architectural, Engineering, and Construction Firms: Case Study of Vietnam, 383

Air entrainment

- Critical Submergence for Multiple Pipe Intakes, 1025
- Developing Flow Region and Pressure Fluctuations on Steeply Sloping Stepped Spillways, 1030
- Evaluation of Preaeration with V-Notch Weir and Cascade Structures in Clarifiers, 591

Air flow

- CFD Predictions and Experimental Comparisons of Pressure Drop Effects of Turning Vanes in 90° Duct Elbows, 425

Air pollution

- Contaminants of Emerging Environmental Concern, 2047
- Requirements and Incentives for Reducing Construction Vehicle Emissions and Comparison of Nonroad Diesel Engine Emissions Data Sources, 300
- Using Regional Climate Center Data to Predict Small Wind Turbine Performance, 1927

Air quality

- Ambient Ozone Formation Contribution in Central Taiwan: Case Study, 1941
- NSF-Water Quality Index: Does It Represent the Experts' Opinion?, 1933
- Transportation, Land Use, Planning, and Air Quality: Selected Papers of the Transportation, Land Use, Planning, and Air Quality Conference 2009, 2086

Air transportation

- Estimating Infrastructure Condition from a Biased Sample, 1219
- Improved Approach to LIDAR Airport Obstruction Surveying Using Full-Waveform Data, 1684
- International Conference on Transportation Engineering 2009, 2060

Aircraft

- Autopilot for Reconfigurable Flight Control System, 51
- Ballistic Impact Response of Kevlar 49 and Zylon under Conditions Representing Jet Engine Fan Containment, 67
- Explicit Finite-Element Analysis of 2024-T3/T351 Aluminum Material under Impact Loading for Airplane Engine Containment and Fragment Shielding, 72
- Real-Time Optimized Trajectory Planning for a Fixed-Wing Vehicle Flying in a Dynamic Environment, 78
- Semianalytical Solution of Wave-Controlled Impact on Composite Laminates, 76

Airport and airfield runways

- Performance Measurements of Pavement Matting System by Full-Scale Testing over Differing Soil Strengths, 1424
- Safely Positioned, 2028

Airport terminals

- Automated People Movers 2009: Connecting People, Connecting Places. Connecting Modes, 2037

Airports and airfields

- Automated People Movers 2009: Connecting People, Connecting Places. Connecting Modes, 2037

SUBJECT INDEX

- Full-Scale Testing of Chemical Dust Palliatives in a Semicontrolled Environment, 1410
- Improved Approach to LIDAR Airport Obstruction Surveying Using Full-Waveform Data, 1684
- Modeling Airport Operations Affected by a Large-Scale Disruption, 1717
- Performance Measurements of Pavement Matting Systems by Full-Scale Testing over Differing Soil Strengths, 1424
- Preparing an Airport for the Olympic Games: Athens, 1184
- Safely Positioned, 2028
- Simulation Approach to Evaluating Cost Efficiency of Selective Demolition Practices: Case of Hong Kong's Kai Tak Airport Demolition, 312
- Air-water interactions**
- Influence of Plunge Pool Geometry on High-Velocity Jet Impact Pressures and Pressure Propagation inside Fissured Rock Media, 999
- Alabama**
- Legal Environment for Warranty Contracting, 1342
- Algorithms**
- Algorithms for Computerized Estimation of Thiessen Weights, 247
- Application of a Nonstandard Explicit Integration to Solve Green and Ampt Infiltration Equation, 1051
- Application of the Analytical Hierarchical Process for Improved Selection of Storm-Water BMPs, 1848
- Comparative Studies in Problems of Missing Extreme Daily Streamflow Records, 1040
- Conjoining MMAS to GA to Solve Construction Site Layout Planning Problem, 377
- Damage Identification Using Electromagnetic Waves Based on Born Imaging Algorithm, 494
- Design of Buckling-Restrained Braced Frames Using Nonlinear Time History Analysis and Optimization, 1573
- Effect of Uncertainty on Water Distribution System Model Design Decisions, 1826
- Effects of Controlling Parameters on Performance of a Decision-Rule Map-Matching Algorithm, 1797
- Efficient Groundwater Remediation System Designs with Flow and Concentration Constraints Subject to Uncertainty, 1835
- Experimental Study of Damage Detection by Data-Driven Subspace Identification and Finite-Element Model Updating, 1674
- Exploring Problems and Undesired Effects in the Construction Development Process: The Case of a Small- to Medium-Sized Developer in Taiwan, 323
- GA-QP Model to Optimize Sewer System Design, 572
- Genetic Algorithm-Based Discharge Estimation at Sites Receiving Lateral Inflows, 1079
- Identification of a Distribution of Stiffness Reduction in Reinforced Concrete Slab Bridges Subjected to Moving Loads, 142
- Illustrative Field Configuration and Evaluation of Traffic-Responsive Control, 1756
- Implementing Metric Operators of a Spatial Query Language for 3D Building Models: Octree and B-Rep Approaches, 225
- Investigating the Effectiveness of Certain Priority Rules on Resource Scheduling of Housing Estate Projects, 329

Aluminum

- Jointly Robust Estimation of Unknown Parameters and Variance Components Based on Expectation-Maximization Algorithm, 1675
- Methodology for Automating the Identification and Localization of Construction Components on Industrial Projects, 222
- Modified Harmony Search Algorithm and Neural Networks for Concrete Mix Proportion Design, 227
- Multiple Linear Regression and Artificial Neural Networks Models for Generalized Reservoir Storage — Yield — Reliability Function for Reservoir Planning, 1105
- New Method That Solves the Three-Point Resection Problem Using Straight Lines Intersection, 1680
- Optimal Layout Design of a Satellite Module Using a Coevolutionary Method with Heuristic Rules, 54
- Optimal Location and Control of Pressure Reducing Valves in Water Networks, 1840
- Optimization of Pile Groups Using Hybrid Genetic Algorithms, 778
- Pivoting Strategies in the Solution of the Saint-Venant Equations, 1235
- Rendezvous Guidance Trajectories via Multiple-Subarc Sequential Gradient-Restoration Algorithm, 60
- River Flow Prediction Using an Integrated Approach, 1038
- Scale Interactions in Radar Rainfall Estimation Uncertainty, 1129
- Spatial and Temporal Exposure to Safety Hazards in Construction, 343
- Stochastic Optimization Model and $O(N^2)$ Solution Algorithm for Highway Investment Decision Making under Budget Uncertainty, 1735
- Storm Identification and Tracking Algorithm for Modeling of Rainfall Fields Using 1-h NEXRAD Rainfall Data in Texas, 1104
- Time-Profit Trade-Off Analysis for Construction Projects, 342
- Transit Route Network Design Problem: Review, 1746
- Use of a Hybrid Algorithm for Modeling Coordinated Feeder Bus Route Network at Suburban Railway Station, 1696
- Water Distribution Network Design Using Heuristics-Based Algorithm, 261
- Water Rationing Model for Consequence Minimization of Water Infrastructure Destruction, 1830
- Alignment**
- Modeling the Effects of Socioeconomic Factors in Highway Construction and Expansion, 1800
- Optimization Method for Highway Horizontal Alignment Design, 1718
- Tight-Fit Tunneling, 1995
- Alkalies**
- Durability of GFRP Reinforcing Bars Embedded in Moist Concrete, 171
- Splitting Tensile Strength of Fly Ash Activated by Hydrothermal Hot-Pressing Process, 1398
- Aluminum**
- Design of Aluminum Alloy Flexural Members Using Direct Strength Method, 1583
- Finite-Element Analysis of Lamb Wave Propagation in a Thin Aluminum Plate, 62
- Finite-Element Analysis of the Influence of Edge Geometry on Shot Peening Process, 59

Parametric Evaluation of Batch Equilibria for Storm-Water Phosphorus Adsorption on Aluminum Oxide Media, 658

Tests and Design of Aluminum Tubular Sections Subjected to Concentrated Bearing Load, 1605

Treatment of Aluminum Plant Hazardous Wastes Containing Fluorides and PAH, 589

Ammonia

Comparative Study between a Hybrid System and a Biofilm System for the Treatment of Ammonia and Organic Matter in Wastewaters, 611

High Rates of Ammonia Removal in Experimental Oxygen-Activated Nitrification Wetland Mesocosms, 685

Modeling Risk of Failure in Nitrification: Simple Model Incorporating Abundance and Diversity, 648

Retrofitting of an Industrial Chemical Scrubber into a Biotrickling Filter: Performance at a Gas Contact Time below 1 s, 612

Anaerobic treatment

Estimation of Sequential Degradation Rate Coefficients for Chlorinated Ethenes, 1930

Municipal Wastewater Treatment Using a UASB Coupled with Cross-Flow Membrane Filtration, 579

Storm-Water Filter Media Pollutant Retention under Aerobic versus Anaerobic Conditions, 613

Analytical techniques

Analytical Solution for Conservative Solute Transport in One-Dimensional Homogeneous Porous Formations with Time-Dependent Velocity, 524

Analytical Solution of Two-Layer Beam Taking into Account Nonlinear Interlayer Slip, 535

Analytical Solutions for Constant-Flux and Constant-Head Tests at a Finite-Diameter Well in a Wedge-Shaped Aquifer, 959

Analytical Solutions for Open-Channel Temperature Response to Unsteady Thermal Discharge and Boundary Heating, 958

Application of the Analytical Hierarchical Process for Improved Selection of Storm-Water BMPs, 1848

Effect of Embedment and Spacing of Cojoined Skirted Foundation Systems on Undrained Limit States under General Loading, 41

Flow Depletion Induced by Pumping Well from Stream Perpendicularly Intersecting Impermeable/Recharge Boundary, 1284

Isolated Collapsed But-For Delay Analysis Methodology, 324

Poromechanics Response of Inclined Wellbore Geometry in Chemically Active Fractured Porous Media, 530

Poroviscoelastic Two-Dimensional Anisotropic Solution with Application to Articular Cartilage Testing, 462

Simplified Method for Sizing Laterals with Two or More Diameters, 1238

Stochastic Model for Embayed Beaches, 1895

Surface Loading of a Multilayered Viscoroelastic Pavement: Semianalytical Solution, 477

Vertical Stiffness and Deformation Analysis Models of Rubber Isolators in Compression and Compression-Shear States, 516

Anchorage

Analytical Method for Failure of Anchor-Grout-Concrete Anchorage due to Concrete Cone Failure and Interfacial Debonding, 1563

Anchorage of Longitudinal Column Reinforcement in Bridge Monolithic Connections, 1562

Application of FRP Strap in an Innovative Prestressed Method, 1375

Effect of FRP Confinement on Bond Strength of Hooked Bars: Normal-Strength Concrete Structures, 193

Anchors

Effects of Long-Term Dynamic Loading and Fluctuating Water Table on Helical Anchor Performance for Small Wind Tower Foundations, 1483

Further Insights into Postbuckling of Web Panels. I: Review of Flange Anchoring Mechanism, 1528

Further Insights into Postbuckling of Web Panels. II: Experiments and Verification of New Theory, 1529

Installation of Torpedo Anchors: Numerical Modeling, 907

Loss in Anchor Embedment during Plate Anchor Keying in Clay, 875

Optimum Design of Buried Pipeline Block Anchors, 1978

Setup Following Installation of Dynamic Anchors in Normally Consolidated Clay, 777

Special Perforated Steel Plate Shear Walls with Reduced Beam Section Anchor Beams. I: Experimental Investigation, 1549

Tensile Behavior of FRP Anchors in Concrete, 173

Vertical Uplift Capacity of Equally Spaced Horizontal Strip Anchors in Sand, 37

Animals

Microalgal Biomass for Greenhouse Gas Reductions: Potential for Replacement of Fossil Fuels and Animal Feeds, 702

Solid/Liquid Separation of Pig Manure by Biological Flotation: Pilot-Scale Study, 673

Anisotropy

Anisotropic Strength Evaluation of Clay Reinforced with Grout Piles, 880

Compressive Behavior of Granite: Experimental Approach, 1416

Effect of Anisotropy and Destructuration on Behavior of Haarajoki Test Embankment, 30

Elastoplastic Model for Clay with Microstructural Consideration, 514

Macroscopic Elastic Constitutive Relationship of Cast-in-Place Hollow-Core Slabs, 1627

Micro-Macro Quantification of the Internal Structure of Granular Materials, 489

Model for Granular Materials with Surface Energy Forces, 47

Modeling of Flow in Three-Dimensional, Multizone, Anisotropic Porous Media with Weakly Singular Integral Equation Method, 505

Poroviscoelastic Two-Dimensional Anisotropic Solution with Application to Articular Cartilage Testing, 462

Reynolds Stress Anisotropy in Open-Channel Flow, 1002

Validated Mechanistic Model for Geogrid Base Reinforced Flexible Pavements, 1792

Antennas

Cross-Well Radar. I: Experimental Simulation of Cross-Well Tomography and Validation, 851

Cross-Well Radar. II: Comparison and Experimental Validation of Modeling Channel Transfer Function, 852

Approximation methods

Optimization Method for Highway Horizontal Alignment Design, 1718

Seismic History Analysis of Asymmetric Buildings with Soil - Structure Interaction, 1538

Aquatic habitats

Bioretention Impact on Runoff Temperature in Trout Sensitive Waters, 639

Comparison of Enzyme Activities in Vegetated and Nonvegetated Sediments, 605

Image Analyses-Based Nondisruptive Method to Quantify Algal Growth on Concrete Surfaces, 592

Aquifers

Analytical Solution for Conservative Solute Transport in One-Dimensional Homogeneous Porous Formations with Time-Dependent Velocity, 524

Analytical Solutions for Constant-Flux and Constant-Head Tests at a Finite-Diameter Well in a Wedge-Shaped Aquifer, 959

ANN-GA-Based Model for Multiple Objective Management of Coastal Aquifers, 1853

Approximate Analytical Solution to Groundwater Velocity Variance in Unconfined Trending Aquifers in the Presence of Complex Sources and Sinks, 1147

Approximate Solution of Nonlinear Boussinesq Equation, 1151

Aquifer Parameter Estimation for a Constant-Flux Test Performed in a Radial Two-Zone Aquifer, 1304

Artificial Recharge in Multiaquifers of a Mountainous Watershed, 1052

Characterization of Groundwater Contamination Using Factor Analysis in the Niger Delta (Nigeria), 1162

Conceptual Model for the Safe Withdrawal of Freshwater from Coastal Aquifers, 686

Coupled Solution for Forced Recharge in Confined Aquifers, 1172

Drawdown due to Pumping a Partially Penetrating Large-Diameter Well Using MODFLOW, 1271

Drawdown due to Temporally Varying Pumping Discharge: Inversely Estimating Aquifer Parameters, 1257

Effective Procedure for Determination of Aquifer Parameters from Late Time-Drawdown Data, 1077

Effects of Bed Slope on Water Head and Flow Rate at the Interfaces between the Stream and Groundwater: Analytical Study, 1116

Flow Depletion Induced by Pumping Well from Stream Perpendicularly Intersecting Impermeable/Recharge Boundary, 1284

Generalized Analytical Solutions for Groundwater Head in a Horizontal Aquifer in the Presence of Subsurface Drains, 1261

Groundwater Recharge through a Multiaquifer Shaft near a Flooding Stream, 1039

Kernel Method for Transient Rate and Volume of Well Discharge under Constant Drawdown, 1256

Numerical Study of Bromide as a Tracer for Aquifer Macrodispersivity Tests: Comparing Conservative Behavior to Mildly Nonlinear Adsorption, 1177

Representing the Coastal Boundary Condition in Regional Groundwater Flow Models, 1115

Saltwater Intrusion Management of Coastal Aquifers. I: Linked Simulation-Optimization, 1163

Saltwater Intrusion Management of Coastal Aquifers. II: Operation Uncertainty and Monitoring, 1164

Simple Model for Analyzing Transient Pumping from Two Aquifers without Cross Flow, 1236

Stream Depletion in a Two-Layer Leaky Aquifer System, 1124

Symmetry in Nonlinear Hydrologic Dynamics under Uncertainty: Ensemble Modeling of 2D Boussinesq Equation for Unsteady Flow in Heterogeneous Aquifers, 1153

Theoretical Boundary Condition of Groundwater Flow at Drawdown End, 1152

Arbitration

Arbitral Tribunal Proceedings Case Study: Egyptian Large-Scale Construction Project, 1327

Archaeology

Different Approaches for Estimating Ground Strains from Pile Driving Vibrations at a Buried Archeological Site, 839

Arches

Equivalent Beam-Column Method to Estimate In-Plane Critical Loads of Parabolic Fixed Steel Arches, 141

Failure Mechanisms in Sand over a Deep Active Trapdoor, 901

In-Plane Load-Deflection Behavior and Buckling of Pressurized Fabric Arches, 1654

On the Flexural Analysis of Sandwich and Composite Arches through an Isoparametric Higher-Order Model, 487

Strengthening of Brick Masonry Arches with Externally Bonded Steel Reinforced Composites, 211

Stress Analysis of Monolithic Circular Arches Strengthened with Composite Materials, 208

Architecture

SUBJECT INDEX

Contracts

Consulting services

Strengths, Weaknesses, Opportunities, and Threats:
Case Study of Consulting Firms in Shenzhen, China,
332

Contact pressure

Contact Interface Model for Shallow Foundations Sub-
jected to Combined Cyclic Loading, 769

Elastic Settlement under Eccentrically Loaded Rectan-
gular Surface Footings on Sand Deposits, 877

Containers

Typology of Long-Term Port Efficiency Improvement
Paths: Malmquist Total Factor Productivity for
World Container Ports, 1214

Containment

Ballistic Impact Response of Kevlar 49 and Zylon
under Conditions Representing Jet Engine Fan Con-
tainment, 67

Containment of Sulfate Pollution in Soil by Natural
Geotextile from Jute, 1368

Dynamic Loads in the Fan Containment Structure of a
Turbofan Engine, 69

Continuing education

Engineers and White-Collar Crime, 1317

Experiential Learning in Engineering Practice, 1513

Continuous beams

Deformation Analysis of Prestressed Continuous
Steel-Concrete Composite Beams, 1660

Numerical Analysis of Continuous Beams Prestressed
with External Tendons, 116

Continuum mechanics

A Generalized Continuum Theory and Its Relation to
Micromorphic Theory, 443

Model Describing Material-Dependent Deformation
Behavior in High-Velocity Metal Forming Process-
es, 461

Contract management

Consultants' Perceptions on Construction Delay Analy-
sis Methodologies, 401

Contractual Approach for Facilitating the Resolution of
Dispute over a Contractor's Failure to Comply with
Time Limit for Notice of Delays, 1326

Whole Life Performance Assessment: Critical Success
Factors, 387

Contraction

Calculation of Contraction Coefficient under Sluice
Gates and Application to Discharge Measurement,
1029

Contraction, Dilation, and Failure of Sand in Triaxial,
Torsional, and Rotational Shear Tests, 537

Hydraulic Jumps in an Inclined Rectangular Chute
Contraction, 1014

Contractors

Construction Learning Curves, 1959

Contractor Perspective on Factors for Evaluating
Installation Options for Small-Diameter Utilities,
274

Design-Build/EPC Contractor's Heightened Risk—
Changes in a Changing World, 1315

Drivers for Adopting Public Private Partnerships—
Empirical Comparison between China and Hong
Kong Special Administrative Region, 384

Duties and Responsibilities of Construction Managers:
Perceptions of Parties Involved in Construction, 410

Early Contractor Involvement in Design and Its Impact
on Construction Schedule Performance, 1332

Evaluating Qualification-Based Selection System: A
Simulation Approach, 313

Factors Influencing Building Contractors' Pricing for
Time-Related Risks in Tenders, 280

Fundamental Principles of Weather Mitigation, 1961

Measuring Safety Climate of a Construction Company,
361

Modeling the Dynamics of Heavy Equipment Manage-
ment Practices and Downtime in Large Highway
Contractors, 366

Monte Carlo Simulation Approach to Support Alliance
Team Selection, 381

Offshore Outsourcing in Global Design Networks,
1348

Organizational Culture and Knowledge Management
Success at Project and Organizational Levels in Con-
tracting Firms, 408

Performance and Strategy of Chinese Contractors in
the International Market, 277

Relative Importance of Subcontractor Selection Crite-
ria: Evidence from Singapore, 354

Strengths, Weaknesses, Opportunities, and Threats
Analysis of Chinese Construction Companies in the
Global Market, 1347

Study of Factors Influencing the Efficient Management
and Downtime Consequences of Highway Construc-
tion Equipment in Thailand, 267

Contracts

Avoiding and Mitigating Delay and Disruption Claims
Conflict: Role of Precontract Negotiation, 1319

Budgeting Performance-Based Winter Maintenance:
Snow Influence on Highway Maintenance Cost,
1204

Contractors' Claims Insurance: A Risk Retention
Approach, 353

Developing a Performance Index for Relationship-
Based Construction Projects in Australia: Delphi
Study, 1337

Effect of Specifications Type on the Quality of Paving
Contracts in New Brunswick, 351

Efficacy of Trust-Building Tactics in Construction
Mediation, 338

Enhancing Total Quality Management by Partnering in
Construction, 1524

Estimating Work Zone Road User Cost for Alternative
Contracting Methods in Highway Construction Proj-
ects, 328

Float Allocation Using the Total Risk Approach, 275

Identification of Decision Drivers for the Strategy of
Incorporating Utility Relocations into Highway Con-
struction Contracts, 352

Impact of Inaccurate Engineer's Estimated Quantities
on Unit Price Contracts, 386

Influences of Chinese Cultural Orientations and
Conflict Management Styles on Construction Dis-
pute Resolving Strategies, 368

Integrating Green Specifications in Construction and
Overcoming Barriers in Their Use, 1525

Legal Environment for Warranty Contracting, 1342

Owner's Risks versus Control in Transit Projects, 1354

Procurement of Design-Build Services: Two-Phase
Selection for Highway Projects, 1334

Project Management in the Chinese Construction
Industry: Six-Case Study, 374

- Risk-Based Model for Pricing Highway Infrastructure Warranties, 1218
- Sources of Changes in Design – Build Contracts for a Governmental Owner, 326

SUBJECT INDEX

Cyclic loads

Critical flow

- Bernoulli Theorem, Minimum Specific Energy, and Water Wave Celerity in Open-Channel Flow, 1311
- Bridge Rail Rating Curves and Submergence Characteristics, 934

Supercritical Flow Measurement Using a Small Parshall Flume, 1303

Critical loads

- Equivalent Beam-Column Method to Estimate In-Plane Critical Loads of Parabolic Fixed Steel Arches, 141

Critical path method

- Consultants' Perceptions on Construction Delay Analysis Methodologies, 401
- Float Types in Linear Schedule Analysis with Singularity Functions, 303
- Productivity Scheduling Method: Linear Schedule Analysis with Singularity Functions, 291
- Transform Schemes Applied on Non-Finish-to-Start Logical Relationships in Project Network Diagrams, 358

Crops

- Effect of Preharvest Deficit Irrigation on Second Crop Watermelon Grown in an Extremely Hot Climate, 1242
- Effects of Different Levels of Irrigation Water Salinity and Leaching on Yield and Yield Components of Wheat in an Arid Region, 1227
- Estimating Reference Crop Evapotranspiration with ETgages, 1265
- Estimation of Soil and Crop Hydraulic Properties, 1288
- Evaluation of a Nonlinear Root-Water Uptake Model, 1262
- Evaluation of Water Retention Functions and Computer Program "Rosetta" in Predicting Soil Water Characteristics of Seasonally Impounded Shrink — Swell Soils, 1260
- Prototype Geographic Information System for Agricultural Water Quality Management Using CropSyst, 1231
- Reservoir Operation and Water Allocation to Mitigate Drought Effects in Crops: A Multilevel Optimization Using the Drought Frequency Index, 1868
- Soil Moisture Dynamics Modeling Considering the Root Compensation Mechanism for Water Uptake by Plants, 1126
- Soil Moisture Flow Modeling with Water Uptake by Plants (Wheat) under Varying Soil and Moisture Conditions, 1269
- Water Quality Impacts of Corn Production to Meet Biofuel Demands, 701

Cross sections

- Composite Bars of Arbitrary Cross Section in Nonlinear Elastic Nonuniform Torsion by BEM, 557
- Elemental T and Y Shapes of Tree Networks of Ducts with Various Cross-Sectional Shapes, 938
- Improved Channel Cross-Section with Two-Segment Parabolic Sides and Horizontal Bottom, 1267
- In-Plane Load-Deflection Behavior and Buckling of Pressurized Fabric Arches, 1654
- Least-Cost and Most Efficient Channel Cross Sections, 1255
- Optimal Cross-Sectional Spacing in Preissmann Scheme 1D Hydrodynamic Models, 935
- Semianalytical Modeling of Concrete Beams Rehabilitated with Externally Prestressed Composites, 172

Uniform Flow of Modified Bingham Fluids in Narrow Cross Sections, 987

Waves Generated by a Pressure Disturbance Moving in a Channel with a Variable Cross-Sectional Topography, 1892

Culverts

- Behavior of Reinforced Concrete Box Culverts under High Embankments, 1564
- Finite-Element Modeling and Analysis of Reinforced Concrete Box Culverts, 1709
- Laboratory Testing to Examine Deformations and Moments in Fiber-Reinforced Cement Pipe, 899
- Load Performance of In Situ Corrugated Steel Highway Culverts, 1458
- Response of Long-Span Box Type Soil-Steel Composite Structures during Ultimate Loading Tests, 154

Currents

- Changes in Turbulent Flow Structure under Combined Wave-Current Motions, 1901
- Hydrodynamics of Wave and Current Vegetation Interaction, 1169

SUBJECT INDEX

Durability

Driven piles

Contemporary Topics in Deep Foundations (GSP 185), 2048

Resistance Factors for Use in Load and Resistance Factor Design of Driven Pipe Piles in Sands, 734

Driver behavior

Determinants of Speeding Behavior of Drivers in Al Ain (United Arab Emirates), 1771

Disaggregate Propensity Study on Red Light Running Crashes Using Quasi-Induced Exposure Method, 1707

Drop structures

Characteristics of Shear Layer Structure in Skimming Flow over a Vertical Drop Pool, 566

Hydraulics of Tangential Vortex Intake for Urban Drainage, 941

Scouring at Bed Sills as a Response to Flash Floods, 971

Droughts

Assessing Vulnerability to Natural Hazards: Impact-Based Method and Application to Drought in Washington State, 1912

Assessment of the Replicate Compression Heuristic to Improve Efficiency of Urban Water Supply Headworks Optimization, 1867

Critical Drought Analysis: Case Study of Gökusu River (Turkey) and North Atlantic Oscillation Influences, 1112

Daily Pan Evaporation Modeling in a Hot and Dry Climate, 1113

Development of a Hybrid Index for Drought Prediction: Case Study, 1094

Forecasting Palmer Index Using Neural Networks and Climatic Indexes, 1091

Improved Drought Management of Falls Lake Reservoir: Role of Multimodel Streamflow Forecasts in Setting up Restrictions, 1841

Irrigation System Modernization: Case Study of the Middle Rio Grande Valley, 1245

Link between Impervious Cover and Base Flow in the White Clay Creek Wild and Scenic Watershed in Delaware, 1064

New Methodology for the Risk Analysis and Economic Impact Assessment of Agricultural Droughts, 1298

Operative Approach to Agricultural Drought Risk Management, 1299

Optimization of Reservoir Hedging Rules Using Multiobjective Genetic Algorithm, 1857

Rainfall Analysis for the Northern Wadis of United Arab Emirates: A Case Study, 1086

Reservoir Operation and Water Allocation to Mitigate Drought Effects in Crops: A Multilevel Optimization Using the Drought Frequency Index, 1868

Social, Political, and Institutional Setting: Water Management Problems of the Rio Grande, 1872

Ductility

Analytical Response and Design of Buildings with Metallic Structural Fuses. I, 1566

Blast Resistance Capacity of Reinforced Concrete Slabs, 1596

Comparative Evaluation of Base-Isolated and Fixed-Base Buildings Using a Comprehensive Response Index, 1595

Contact Interface Model for Shallow Foundations Subjected to Combined Cyclic Loading, 769

Cyclic Behavior of RC Columns Strengthened by FRP and Steel Devices, 1639

Ductile Design of Glued-Laminated Timber Beams, 1970

Effectiveness of Some Strengthening Options for Masonry-Infilled RC Frames with Open First Story, 1616

Experimental and Parametric Study of Circular Short Columns Confined with CFRP Composites, 178

Experimental Response of Buildings Designed with Metallic Structural Fuses. II, 1567

In-Plane Experimental Behavior of Stone Masonry Walls under Cyclic Loading, 1649

New Lateral Force Distribution for Seismic Design of Structures, 1614

New Model for the Analysis of Size-Scale Effects on the Ductility of Reinforced Concrete Elements in Bending, 450

Semiactive Viscous Tensile Bracing System, 1570

Simplified Method to Include Cumulative Damage in the Seismic Response of Single-Degree-of-Freedom Systems, 530

Yield Penetration Hinge Rotation in Reinforced Concrete Beams, 1541

Ducts

Critical Review of Aerosol Particle Transport Models for Building HVAC Ducts, 100

Effects of Duct Types and Emulsifiable Oils on Bond and Friction Losses in Posttensioned Concrete, 11

Measurement Techniques for Estimating Local and Total Duct Leakages in Residential Buildings, 411

Probabilistic Capacity Models for Corroding Posttensioning Strands Calibrated Using Laboratory Results, 513

Dunes

Berm and Dune Erosion during a Storm, 1880

Durability

Carbonation and pH in Mortars Manufactured with Supplementary Cementitious Materials, 1381

Durability of GFRP Reinforcing Bars Embedded in Moist Concrete, 171

Effects of Corrosion of Steel Reinforcement on RC Columns Wrapped with FRP Sheets, 1457

Effects of Duct Types and Emulsifiable Oils on Bond and Friction Losses in Posttensioned Concrete, 11

Engineering Properties and Moisture Susceptibility of Silty Clay Stabilized with Lime, Class C Fly Ash, and Cement Kiln Dust, 1448

Evaluation of Binary and Ternary Blends of Pozzolanic Materials Using the Rapid Chloride Permeability Test, 1409

Evaluation of Water-Repelling Additives for Use in Concrete-Based Sanitary Sewer Infrastructure, 1190

Fatigue Performance of CFRP Strengthened RC Beams under Environmental Conditioning and Sustained Load, 174

In Situ Performance of Self-Compacting Concrete in T-Beams, 1365

Integrity Problem of Large-Diameter Bored Piles, 754

Monitoring Corrosion of Rebar Embedded in Mortar Using High-Frequency Guided Ultrasonic Waves, 428

Predicting the Environmental Lifetime of Adhesive Joints under Laboratory Conditions, 1434

Quantitative Interpretation of Half-Cell Potential Measurements in Concrete Structures, 1412

Resistance of Scoria-Based Blended Cement Concrete against Deterioration and Corrosion in Mixed Sulfate Environment, 1391

Dust

Engineering Properties and Moisture Susceptibility of Silty Clay Stabilized with Lime, Class C Fly Ash, and Cement Kiln Dust, 1448

Full-Scale Testing of Chemical Dust Palliatives in a Semicontrolled Environment, 1410

Lunar Dust Levitation, 42

Short-Term Electrical Conductivity and Strength Development of Lime Kiln Dust Modified Soils, 787

Dyes

Capacity of Activated Carbon Derived from Peach Stones by K_2CO_3 in the Removal of Acid, Reactive, and Direct Dyes from Aqueous Solution, 609

Equilibrium and Kinetic Study on Reactive Dyes Adsorption by Palm Kernel Shell-Based Activated Carbon: In Single and Binary Systems, 732

Mass Transport in Shallow Turbulent Wake Flow by Planar Concentration Analysis Technique, 951

Dynamic analysis

Cross Correlations of Modal Responses of Tall Buildings in Wind-Induced Lateral-Torsional Motion, 503

Dynamic Soil - Structure Interaction of Bridge Substructure Subject to Vessel Impact, 108

Free Vibration of Three-Dimensional Orthotropic Uniform Shear Beam-Columns with Generalized End Conditions, 504

Intrinsic Damping: Modeling Techniques for Engineering Systems, 1556

Investigation of Progressive Collapse-Resisting Capability of Steel Moment Frames Using Push-Down Analysis, 1492

New Lateral Force Distribution for Seismic Design of Structures, 1614

Numerical and Experimental Assessment of Advanced Concepts to Reduce Noise and Vibration on Urban Railway Turnouts, 1725

Overcoming Load Discontinuity in Step-by-Step Solution of Shock Response, 496

Seismic Response and Performance of Buckling-Restrained Braced Frames, 8

Train-Induced Vibrations on Urban Metro and Tram Turnouts, 1738

Dynamic loads

Case Study: Planar Kinematics of Dragline for Efficient Machine Control, 55

Determination of Dynamic Track Modulus from Measurement of Track Velocity during Train Passage, 900

Dynamic Loads in the Fan Containment Structure of a Turbofan Engine, 69

Effects of Long-Term Dynamic Loading and Fluctuating Water Table on Helical Anchor Performance for Small Wind Tower Foundations, 1483

Equivalent Wheel Load Approach for Slender Cable-Stayed Bridge Fatigue Assessment under Traffic and Wind: Feasibility Study, 3

Identification of a Distribution of Stiffness Reduction in Reinforced Concrete Slab Bridges Subjected to Moving Loads, 142

Mathematical Model to Generate Asymmetric Pulses due to Human Jumping, 542

Dynamic models

Dynamic Modeling of Bentazon Removal by Pseudo-Moving-Bed Granular Activated Carbon Filtration Applied to Full-Scale Water Treatment, 598

Intrinsic Damping: Modeling Techniques for Engineering Systems, 1556

Mathematical Model to Generate Asymmetric Pulses due to Human Jumping, 542

Modeling the Dynamics of Heavy Equipment Management Practices and Downtime in Large Highway Contractors, 366

Multiperiod Competition in an Electric Power Network and Impacts of Infrastructure Disruptions, 1179

Statistical - Dynamical Approach for Streamflow Modeling at Malakal, Sudan, on the White Nile River, 1049

Dynamic pressure

Influence of Plunge Pool Geometry on High-Velocity Jet Impact Pressures and Pressure Propagation inside Fissured Rock Media, 999

Response of Bonded Membrane Retrofit Concrete Masonry Walls to Dynamic Pressure, 1463

Dynamic properties

Dynamic Properties of Highly Organic Soils from Montezuma Slough and Clifton Court, 781

Learning of Dynamic Soil Behavior from Downhole Arrays, 803

Nondestructive Analysis of a Concrete Tunnel Model Using a Newly Proposed Combined Stress Wave Propagation Method, 1504

Regression Models for Dynamic Properties of Highly Organic Soils, 782

Shear Strength of Municipal Solid Waste, 800

Strain-Rate Sensitivity of a Pultruded E-Glass/Polyester Composite, 218

Dynamic response

Behavior of Reinforced and Posttensioned Concrete Members with a UHPFRC Overlay under Impact Loading, 1557

Bidirectional Pseudodynamic Testing, 544

Design of a Static Thruster for Microair Vehicle Rotorcraft, 52

Development of Nailed Wood Joint Element in ABAQUS, 1620

Dynamic Response of Compacted CG, DM, and CG-DM Blends, 844

Finite-Element Calculation of Elastodynamic Stress Intensity Factors along a 3D Nonplanar Curved Crack, 484

Nonlinear Analysis of Ordinary Bridges Crossing Fault-Rupture Zones, 128

Overcoming Load Discontinuity in Step-by-Step Solution of Shock Response, 496

Vertical Vibration of a Flexible Foundation Resting on Saturated Layered Soil Half-Space, 26

Vertical Vibration of Full-Scale Pile - Analytical and Experimental Study, 873

Vibro-Impact Behavior of Two Orthogonal Beams, 478

Vulnerability Screening and Capacity Assessment of Reinforced Concrete Columns Subjected to Blast, 1495

Dynamic stability

Investigation of Layer Contributions to Asphalt Pavement Rutting, 1376

Dynamic structural analysis

Dynamics of a Class of Horizontal Setback Buildings with Flexible Floor Diaphragm, 1611

Nonlinear Earthquake Response Modeling of a Large-Scale Two-Span Concrete Bridge, 151

Dynamic tests

Dynamic Characterization Test of the New Law Court in Naples, 1456

Experimental Response of Piles in Sand under Compound Motion, 808

Experimental Studies on Real-Time Testing of Structures with Elastomeric Dampers, 1635

Load Performance of In Situ Corrugated Steel Highway Culverts, 1458

Output-Only Dynamic Testing of Rameses II Colossus by Singular Value Decomposition, 1468

Dynamics

Dynamic Effects on Moisture Transport in Asphalt Concrete, 2

Model and Control of Flexible Multibody Satellite, 57

Modeling the Mechanical Behavior of Lung Tissue at the Microlevel, 468

Simulation of Dynamic Effects of Vehicles on Pavement Using a 3D Interaction Model, 1773

Trajectory Analysis for Vertical Takeoff and Vertical Landing Reusable Launch Vehicle's Upper Stage, 49

Earth pressure

Active Earth Pressure on Retaining Wall for c - Φ Soil Backfill under Seismic Loading Condition, 798

New Earth Retention System with Prestressed Wales in an Urban Excavation, 887

Numerical Investigation of the Stress State in Inclined Backfilled Slopes, 21

On Global Equilibrium in Design of Geosynthetic Reinforced Walls, 761

Earthmoving

Optimization of Earthmoving Operations in Heavy Civil Engineering Projects, 367

Earthquake engineering

Application of Energy Balance Concept in Seismic Evaluation of Structures, 1539

Design of Steel Plate Shear Walls Considering Boundary Frame Moment Resisting Action, 1672

Exploring the Effectiveness of Chinese-to-English Machine Translation for CLIR Applications in Earthquake Engineering, 236

Free Vibration of Three-Dimensional Orthotropic Uniform Shear Beam-Columns with Generalized End Conditions, 504

Impact of Code Requirements in the Central United States: Seismic Performance Assessment of a Reinforced Concrete Building, 1568

Interaction of Shallow Foundations with Reverse Faults, 819

Investigation of Effects of Nonlinear Static Analysis Procedures to Performance Evaluation on Low-Rise RC Buildings, 1507

Linear Analysis of Ordinary Bridges Crossing Fault-Rupture Zones, 127

Mitigation of Liquefaction-Induced Lateral Deformation in a Sloping Stratum: Three-dimensional Numerical Simulation, 894

Nonlinear Analysis of Ordinary Bridges Crossing Fault-Rupture Zones, 128

Nonlinear Viscoelastic Wave Propagation: An Extension of Nearly Constant Attenuation Models, 552

Optimization and Multihazard Structural Design, 568

Seismic Fragility Analysis and Retrofit of Conventional Residential Wood-Frame Structures in the Central United States, 1554

Seismic Performance Evaluation of Facilities: Methodology and Implementation, 1637

Special Perforated Steel Plate Shear Walls with Reduced Beam Section Anchor Beams. II: Analysis and Design Recommendations, 1550

TCLEE 2009: Lifeline Earthquake Engineering in a Multihazard Environment, 2084

Earthquake loads

Prediction of Fatigue Life of Welded Beam-to-Column Connections under Earthquake Loading, 1668

Seismic Reliability Analysis of Diagonal-Braced and Structural-Panel-Sheathed Wood Shear Walls, 1586

Seismic Risk Assessment of Gravity Load Designed Reinforced Concrete Frames Subjected to Mid-America Ground Motions, 1569

Semiautomatic Viscous Tensile Bracing System, 1570

Earthquake resistant structures

Frame Element for Metallic Shear-Yielding Members under Cyclic Loading, 1634

Performance of Template School Buildings during Earthquakes in Turkey and Peru, 1455

Quantitative Comparison of Optimization Approaches for the Design of Supplemental Damping in Earthquake Engineering Practice, 1559

Reconsideration of Seismic Performance and Design of Beam-Column Joints of Earthquake-Resistant Reinforced Concrete Frames, 1601

Earthquakes

Active Earth Pressure on Retaining Wall for c - Φ Soil Backfill under Seismic Loading Condition, 798

Analyzing the Reinforcement Loads of Geosynthetic-Reinforced Soil Walls Subject to Seismic Loading during the Service Life, 1487

Correcting Liquefaction Resistance for Aged Sands Using Measured to Estimated Velocity Ratio, 802

Cyclic Behavior of Fine-Grained Soils at Different pH Values, 757

Development of a Wood-Frame Shear Wall Model in ABAQUS, 1621

Direct Adaptive Neurocontrol of Structures under Earth Vibration, 266

Effect of Friction on Unbonded Elastomeric Bearings, 517

Effect of Soil Permeability on Centrifuge Modeling of Pile Response to Lateral Spreading, 739

Experimental Study of the XY-Friction Pendulum Bearing for Bridge Applications, 126

Framework for Multihazard Risk Assessment and Mitigation for Wood-Frame Residential Construction, 1544

L'Aquila, Italy: The Next Lesson, 2026

Liquefaction Resistance of Sandy Soils under Partially Drained Condition, 833

Modeling Postearthquake Fire Ignitions Using Generalized Linear (Mixed) Models, 1215

Nonlinear Earthquake Response Modeling of a Large-Scale Two-Span Concrete Bridge, 151

SUBJECT INDEX

Shear flow

ICPTT 2009: Advances and Experiences with Pipelines and Trenchless Technology for Water, Sewer, Gas, and Oil Applications, 2058

Sewers

Comparison of 1D/1D and 1D/2D Coupled (Sewer/Surface) Hydraulic Models for Urban Flood Simulation, 974

Evaluation of Water-Repelling Additives for Use in Concrete-Based Sanitary Sewer Infrastructure, 1190

GA-QP Model to Optimize Sewer System Design, 572

Structural Assessment and Upgrading of Sewers Based on Inspection Results, 1212

Tractive Force Design for Sanitary Sewer Self-Cleansing, 725

Shafts

Groundwater Recharge through a Multiaquifer Shaft near a Flooding Stream, 1039

Hydraulics of Tangential Vortex Intake for Urban Drainage, 941

Shaft Capacity of Continuous Flight Auger Piles in Sand, 807

Shake table tests

Nonlinear Earthquake Response Modeling of a Large-Scale Two-Span Concrete Bridge, 151

Nonlinear Modeling of Flat-Plate Systems, 1543

Shallow foundations

Contact Interface Model for Shallow Foundations Subjected to Combined Cyclic Loading, 769

Contemporary Topics in Ground Modification, Problem Soils, and Geo-Support (GSP 187), 2049

Effect of Embedment and Spacing of Cojoined Skirted Foundation Systems on Undrained Limit States under General Loading, 41

Effects of Moment-to-Shear Ratio on Combined Cyclic Load-Displacement Behavior of Shallow Foundations from Centrifuge Experiments, 834

Experimental Investigation of the Reinstallation of Spudcan Footings Close to Existing Footprints, 776

Interaction of Shallow Foundations with Reverse Faults, 819

Numerical Study of the Effect of Foundation Size for a Wide Range of Sands, 737

Plate Load Tests on Cemented Soil Layers Overlaying Weaker Soil, 911

Shallow water

Case Study: Hydraulic Modeling of Runoff Processes in Ghanaian Inland Valleys, 978

Fertigation in Furrows and Level Furrow Systems. I: Model Description and Numerical Tests, 1272

Fertigation in Furrows and Level Furrow Systems. II: Field Experiments, Model Calibration, and Practical Applications, 1273

Investigation of the Importance of Spatial Resolution for Two-Dimensional Shallow-Water Model Accuracy, 1011

Lagrangian Modeling of Weakly Nonlinear Nonhydrostatic Shallow Water Waves in Open Channels, 1012

Mass Transport in Shallow Turbulent Wake Flow by Planar Concentration Analysis Technique, 951

Modeling Floating Objects at River Structures, 966

Sensitivity Equations for the One-Dimensional Shallow Water Equations: Practical Application to Model Calibration, 1119

Statistical Approach to Model the Deep Draft Ships' Squat in the St. Lawrence Waterway, 1888

Waves Generated by a Pressure Disturbance Moving in a Channel with a Variable Cross-Sectional Topography, 1892

Well-Balanced Bottom Discontinuities Treatment for High-Order Shallow Water Equations WENO Scheme, 492

Shear

Efficient CFRP Strap Configurations for the Shear Strengthening of Reinforced Concrete T-Beams, 169

Mechanical Characterization of an Artificial Clay, 758

Model for Reinforced Concrete Members under Torsion, Bending, and Shear. I: Theory, 518

Model for Reinforced Concrete Members under Torsion, Bending, and Shear. II: Model Application and Validation, 519

Modeling of an Unbonded CFRP Strap Shear Retrofitting System for Reinforced Concrete Beams, 194

Shear deformation

Fracture Behavior of Multidirectional DCB Specimen: Higher-Order Beam Theories, 534

Plastic-Buckling of Rectangular Plates under Combined Uniaxial and Shear Stresses, 511

Reconsideration of Seismic Performance and Design of Beam-Column Joints of Earthquake-Resistant Reinforced Concrete Frames, 1601

Simple rational Model for Reinforced Concrete Subjected to Seismic Shear, 1600

Shear distribution

Analytical and Experimental Investigation of Bridge Girder Shear Distribution Factors, 122

Shear failures

Hysteretic Behavior and Strength Capacity of Shallowly Embedded Steel Column Bases, 1645

Hysteretic Model for Reinforced Concrete Columns Including the Effect of Shear and Axial Load Failure, 1542

Maximum Shear Strength of RC Beams Retrofitted in Shear with FRP Composites, 195

Novel Technique for Inhibiting Buckling of Thin-Walled Steel Structures Using Pultruded Glass FRP Sections, 217

Riprap Stability: Traverse and Longitudinal versus Continuous Protections, 969

Seismic Design of High-Rise Concrete Walls: Reverse Shear due to Diaphragms below Flexural Hinge, 1615

Shear Behavior of Reinforced Concrete Beams Made with Sedimentary Lightweight Aggregate without Shear Reinforcement, 1446

Shear Failure of Pultruded Fiber-Reinforced Polymer Composites under Axial Compression, 188

Simple rational Model for Reinforced Concrete Subjected to Seismic Shear, 1600

Shear flow

Analytical Solution of Two-Layer Beam Taking into Account Nonlinear Interlayer Slip, 535

Measurement of Particle Dynamics in Rapid Granular Shear Flows, 456

Study of Plastic Shear Localization via the Flow Theory of Mechanism-Based Strain Gradient Plasticity, 441

Shear lag

Static Design Recommendations for Slotted End HSS Connections in Tension, 1604

Shear modulus

Dynamic Properties of Highly Organic Soils from Montezuma Slough and Clifton Court, 781

Experimental Characterization of Dynamic Property Changes in Aged Sands, 756

Influence of the Grain-Size Distribution Curve of Quartz Sand on the Small Strain Shear Modulus G_{max} , 869

- Geotechnical Surprises — Or Are They?, 830
- Identification and Description of Soils Containing Very Coarse Fractions, 792
- In Situ Soil Response to Vibratory Loading and Its Relationship to Roller-Measured Soil Stiffness, 832
- Measuring Dielectric Constant in Highly Conductive Soils Based on Surface Reflection Coefficients, 915
- Model for the 3D Location of Buried Assets Based on RFID Technology, 237
- Prediction of Soil Properties from the Concepts of Energy Transfer in Dynamic Penetration Tests, 838
- Regression Models for Dynamic Properties of Highly Organic Soils, 782
- Reliability Analysis of Laterally Loaded Piles Involving Nonlinear Soil and Pile Behavior, 771
- Simplified Relationships for Particle-Size Distribution and Permeation Groutability Limits for Soils, 849
- Strain Rate, Creep, and Stress Drop-Creep Experiments on Crushed Coral Sand, 822

Soil sampling

- Carbon and Nitrogen Isotopic Measurements from Southern Appalachian Soils: Assessing Soil Carbon Sequestration under Climate and Land-Use Variation, 623
- Quality of Conventional Fixed Piston Samples of Norwegian Soft Clay, 750

Soil settlement

Predicting RC Frame Response to Excavation-Induced Settlement, 888

Soil stabilization

Advances in Ground Improvement: Research to Practice in the United States and China (GSP 188), 2035

Anisotropic Strength Evaluation of Clay Reinforced with Grout Piles, 880

Beneficial Properties of Coal Ashes and Effective Solid Waste Management, 1953

Blast Densification: Multi-Instrumented Case History, 801

Cement-Modified Backfills for Mechanically Stabilized Earth Walls with Built-In Facing, 1396

Centrifuge Testing of Fiber-Reinforced Soil Liners for Waste Containment Systems, 1931

Colloidal Silica Transport through Liquefiable Porous Media, 897

Contemporary Topics in Ground Modification, Problem Soils, and Geo-Support (GSP 187), 2049

Engineering Properties and Moisture Susceptibility of Silty Clay Stabilized with Lime, Class C Fly Ash, and Cement Kiln Dust, 1448

Full-Scale Testing of Chemical Dust Palliatives in a Semicontrolled Environment, 1410

Improved Prediction of Lateral Deformations due to Installation of Soil-Cement Columns, 910

Key Parameters for the Strength Control of Lime Stabilized Soils, 1380

Limit Analysis of Rigid Foundations on Floating Columns, 24

Liquefaction Resistance of Sandy Soils under Partially Drained Condition, 833

Numerical Study of Reinforced Soil Segmental Walls Using Three Different Constitutive Soil Models, 876

On Global Equilibrium in Design of Geosynthetic Reinforced Walls, 761

Predicted Loads in Steel Reinforced Soil Walls Using the AASHTO Simplified Method, 749

Seismic Displacement Criterion for Soil Retaining Walls Based on Soil Strength Mobilization, 740

Three-Dimensional Numerical Modeling of a Piled Embankment, 25

Vertical and Radial Consolidation Analysis of Multi-layered Soil Using the Spectral Method, 794

Soil strength

Case Study of Undrained Strength Stability Analysis for Dredged Material Placement Areas, 1889

Investigation of Impact of Moisture Variation on Response of Pavements through Small-Scale Models, 1423

Performance Measurements of Pavement Matting Systems by Full-Scale Testing over Differing Soil Strengths, 1424

Strength Properties of JSC-1A Lunar Regolith Simulant, 796

Soil structures

Analyzing the Reinforcement Loads of Geosynthetic-Reinforced Soil Walls Subject to Seismic Loading during the Service Life, 1487

Influence of Clod-Size and Structure on Wetting-Induced Volume Change of Compacted Soil, 889

Long-Term Reinforcement Load of Geosynthetic-Reinforced Soil Retaining Walls, 816

Mineral Dissolution and the Evolution of k_{α} , 843

Seismic Displacement Criterion for Soil Retaining Walls Based on Soil Strength Mobilization, 740

Strain-Rate Effects in Mexico City Soil, 760

Soil suction

Method for Evaluation of Depth of Wetting in Residential Areas, 748

Tensile Strength of Unsaturated Sand, 562

Theoretical Assessment of Increased Tensile Strength of Fibrous Soil Undergoing Desiccation, 912

Theoretical Soil-Water Characteristic Curves Based on Adsorption, Cavitation, and a Double Porosity Model, 39

Uncertainties of Field Pullout Resistance of Soil Nails, 825

Soil tests

Contraction, Dilation, and Failure of Sand in Triaxial, Torsional, and Rotational Shear Tests, 537

Investigation of Impact of Moisture Variation on Response of Pavements through Small-Scale Models, 1423

Soil treatment

Destruction of Trichloroethylene and Perchloroethylene DNAPLs by Catalyzed H_2O_2 Propagations, 634

Enhanced Bioremediation of Fuel-Oil Contaminated Soils: Laboratory Feasibility Study, 670

Kinetics of Pentachlorophenol Degradation in Soil Using Heme and Peroxide, 602

Treatment of Fuel-Oil Contaminated Soils by Biodegradable Surfactant Washing Followed by Fenton-Like Oxidation, 690

Soil water

Actual and Reference Evaporative Losses and Surface Coefficients of a Maize Field during Nongrowing (Dormant) Periods, 1263

Assimilation of Observed Soil Moisture Data in Storm Rainfall-Runoff Modeling, 1046

Curve Number Hydrology: State of the Practice, 2051

Distributed Hydrologic Prediction: Sensitivity to Accuracy of Initial Soil Moisture Conditions and Radar Rainfall Input, 1100

Evaluation of a Nonlinear Root-Water Uptake Model, 1262

Evaluation of Water Retention Functions and Computer Program "Rosetta" in Predicting Soil Water Characteristics of Seasonally Impounded Shrink — Swell Soils, 1260

Hydraulic Behavior of Filter Protected Silt under Cyclic Flow, 846

Influence of Clod-Size and Structure on Wetting-Induced Volume Change of Compacted Soil, 889

Modulus-Suction-Moisture Relationship for Compacted Soils in Postcompaction State, 868

Relationship between the Storage Coefficient and the Soil-Water Retention Curve in Subsurface Agricultural Drainage Systems: Water Table Drawdown, 1259

Soil Moisture Dynamics Modeling Considering the Root Compensation Mechanism for Water Uptake by Plants, 1126

Soil Moisture Flow Modeling with Water Uptake by Plants (Wheat) under Varying Soil and Moisture Conditions, 1269

Subsurface Water Distribution from Furrows Described by Moment Analyses, 1224

Tensile Strength of Unsaturated Sand, 562

SUBJECT INDEX

Solutes

Theoretical Soil-Water Characteristic Curves Based on Adsorption, Cavitation, and a Double Porosity Model, 39

Total Soil Water Evaporation in a Riparian Environment: Model Development and Application, 1125

Variation of Water Retention Characteristics due to Particle Rearrangement under Zero Gravity, 32

Soil-pile interactions

Use of Plastic Hinge Model in Nonlinear Pushover Analysis of a Pile, 863

Soil-pipe interactions

Laboratory Testing to Examine Deformations and Moments in Fiber-Reinforced Cement Pipe, 899

Soils

ACMEG-T: Soil Thermoplasticity Model, 515

Evaluation of Anomalous Solute Transport in a Large Heterogeneous Soil Column with Mobile-Immobile Model, 1131

Influence of Grouting Pressure and Overburden Stress on the Interface Resistance of a Soil Nail, 850

Installation of Torpedo Anchors: Numerical Modeling, 907

Seepage-Induced Acoustic Emission in Granular Soils, 785

Soil-structure interactions

Dynamic Soil - Structure Interaction of Bridge Substructure Subject to Vessel Impact, 108

Experimental Response of Piles in Sand under Compound Motion, 808

Handling of Constraints in Finite-Element Response Sensitivity Analysis, 564

Interaction of Shallow Foundations with Reverse Faults, 819

Investigation of Tunnel-Soil-Pile Interaction in Cohesive Soils, 826

Load Performance of In Situ Corrugated Steel Highway Culverts, 1458

Long-Term Response Prediction of Integral Abutment Bridges, 120

Normal Fault Rupture Interaction with Strip Foundations, 765

Numerical and Experimental Assessment of Advanced Concepts to Reduce Noise and Vibration on Urban Railway Turnouts, 1725

Role of Initial State, Material Properties, and Confinement Condition on Local and Global Soil-Structure Interface Behavior, 892

Seismic History Analysis of Asymmetric Buildings with Soil - Structure Interaction, 1538

Tactile Pressure Sensors for Soil-Structure Interaction Assessment, 891

Three-Dimensional Numerical Modeling of a Piled Embankment, 25

Train-Induced Vibrations on Urban Metro and Tram Turnouts, 1738

Solar power

Correlation for Diffuse Radiation from Global Solar Radiation and Sunshine Data at Beijing, China, 423

Maximum Area That Can Be Economically Irrigated by Solar Photovoltaic Pumping System, 1229

Optimization and Multihazard Structural Design, 568

Solar radiation

Correlation for Diffuse Radiation from Global Solar Radiation and Sunshine Data at Beijing, China, 423

GOES Solar Radiation for Evapotranspiration Estimation and Streamflow Prediction, 1061

Predicting Incoming Solar Radiation and Its Application to Radiation-Based Equation for Estimating Reference Evapotranspiration, 1294

Statistical Analysis of Reference Evapotranspiration on the Tibetan Plateau, 1241

Solid wastes

Beneficial Properties of Coal Ashes and Effective Solid Waste Management, 1953

Composition of Municipal Solid Waste in the United States and Implications for Carbon Sequestration and Methane Yield, 677

Effect of the Presence of Chromium (III) on the Removal of Lead (II) from Aqueous Solutions by Agricultural Wastes, 726

Effect of Waste Composition and Load Application on the Biodegradation of Municipal Solid Waste in Bioreactor Landfills, 1944

Hydraulic Conductivity of MSW in Landfills, 650

Life-Cycle Analysis of Energy and Greenhouse Gas Emissions from Anaerobic Biodegradation of Municipal Solid Waste, 698

Mechanisms of Neutralization of Bauxite Residue by Carbon Dioxide, 622

Optimization of Municipal Solid Waste Collection System: Case Study, 1950

Shear Strength of Municipal Solid Waste, 800

Simplified Kinetic Analysis for Composting of Municipal Solid Waste, 1946

Solidification

Development of Dissipation Model of Excess Pore Pressure in Liquefied Sandy Ground, 783

Solids

CFD Modeling of Solid Separation in Three Combined Sewer Overflow Chambers, 662

Solid/Liquid Separation of Pig Manure by Biological Flotation: Pilot-Scale Study, 673

Solids flow

Laboratory Test and Particle Flow Simulation of Silos Problem with Nonhomogeneous Materials, 902

Uniform Flow of Modified Bingham Fluids in Narrow Cross Sections, 987

Solitary waves

Spectral Collocation Model for Solitary Wave Attenuation and Mass Transport over Viscous Mud, 510

Waves Generated by a Pressure Disturbance Moving in a Channel with a Variable Cross-Sectional Topography, 1892

Solutes

Analytical Solution for Conservative Solute Transport in One-Dimensional Homogeneous Porous Formations with Time-Dependent Velocity, 524

Depth-Dependent Dispersion Coefficient for Modeling of Vertical Solute Exchange in a Lake Bed under Surface Waves, 943

Effect of Passive Surface Water Flux Meter Design on Water and Solute Mass Flux Estimates, 1170

Evaluation of Solute Transport through a Fracture by Considering the Spatial Distributions of Retardation Effect in Grain Scale, 1157

Investigation of Consolidation-Induced Solute Transport. I: Effect of Consolidation on Transport Parameters, 853

Investigation of Consolidation-Induced Solute Transport. II: Experimental and Numerical Results, 854
 Modeling of Flow and Advection Dominant Solute Transport in Variably Saturated Porous Media, 1032
 Poromechanics Response of Inclined Wellbore Geometry in Chemically Active Fractured Porous Media, 550

Solvents

Effect of Increasing Nitrobenzene Loading Rates on the Performance of AMBR and Sequential AMBR/CSTR Reactor System, 601

Sorption

Attenuation of Roadway-Derived Heavy Metals by Wood Chips, 659
 Effects of Steam Addition on the Properties of High Temperature Ceramic CO₂ Acceptors, 617
 Impact of Salinity on MS-2 Sorption in Saturated Sand Columns—Fate and Transport Modeling, 693
 Influence of Sorption Intensity on Solute Mobility in a Fractured Formation, 570
 Integrated Two-Dimensional Surface and Three-Dimensional Subsurface Contaminant Transport Model Considering Soil Erosion and Sorption, 1023
 Investigation of Consolidation-Induced Solute Transport. I: Effect of Consolidation on Transport Parameters, 853
 Investigation of Consolidation-Induced Solute Transport. II: Experimental and Numerical Results, 854
 Sorption Behavior and Mechanism of Pb(II) on Chinese Loess, 576

South Carolina

Blast Densification: Multi-Instrumented Case History, 801

Space construction

Design Futures: *Pop-I* Method for Long-Range Planning of Design Organizations, 1339
 On Earth and In Space, 2025

Space exploration

3D Shape Characterization and Image-Based DEM Simulation of the Lunar Soil Simulant FJS-1, 44
 Jet-Induced Cratering of a Granular Surface with Application to Lunar Spaceports, 45
 Lunar Dust Levitation, 42
 Multiterain Earth Landing Systems Applicable for Manned Space Capsules, 63
 Orion Crew Member Injury Predictions during Land and Water Landings, 64

Space shuttle orbiter

Multiterain Earth Landing Systems Applicable for Manned Space Capsules, 63
 Shuttle Debris Impact Analysis: Postreturn to Flight Real-Time Mission Support, 65
 Structural Design Considerations of an Inflatable Rigidizable Space Shuttle Experiment, 56

Space structures

Conceptual Design of Unpressurized Shelters on Lunar Surface, 84
 Near-Earth Object Threat Mitigation Using a Tethered Ballast Mass, 92
 On Earth and In Space, 2025

Space truss

Torsional Behavior of Concrete-Filled Circular Steel Tube Columns, 1647

Spacecraft

Lunar Dust Levitation, 42
 Multiterain Earth Landing Systems Applicable for Manned Space Capsules, 63
 Rendezvous Guidance Trajectories via Multiple-Subarc Sequential Gradient-Restoration Algorithm, 60
 Robust Backstepping Sliding Mode Attitude Tracking and Vibration Damping of Flexible Spacecraft with Actuator Dynamics, 58

Spacecraft launching

Jet-Induced Cratering of a Granular Surface with Application to Lunar Spaceports, 45
 Trajectory Analysis for Vertical Takeoff and Vertical Landing Reusable Launch Vehicle's Upper Stage, 49

Spacing

Effect of Embedment and Spacing of Cojoined Skirted Foundation Systems on Undrained Limit States under General Loading, 41
 Evaluation of Crack Spacing in Reinforced Concrete Shear Walls, 1577
 Porosity of the Dominant Aggregate Size Range to Evaluate Coarse Aggregate Structure of Asphalt Mixtures, 1358

Spain

Alemanes Footbridge, 1960
 Copula-Based Simulation for the Estimation of Optimal Volume for a Detention Basin, 1176
 Quality of Service in Irrigation Distribution Networks: Case of Palos de la Frontera Irrigation District (Spain), 1309

Spalling

Field Evaluations of the Patch Materials for Partial-Depth Repairs, 1418

Spatial analysis

Comparison of Methods for Defining Geographical Connectivity for Variables of Trip Generation Models, 1743
 Concept and Spatial Analysis Method of Urban Environmental Traffic Capacity, 1788
 Implementing Metric Operators of a Spatial Query Language for 3D Building Models: Octree and B-Rep Approaches, 225
 Influence of Sorption Intensity on Solute Mobility in a Fractured Formation, 570
 Influence of the Spatial Configuration of the Irrigated Zone on the Irrigation Network Layout Design, 1296
 Investigation of the Importance of Spatial Resolution for Two-Dimensional Shallow-Water Model Accuracy, 1011
 Planning for Evacuation: Insights from an Efficient Network Design Model, 1181
 Spatial and Temporal Exposure to Safety Hazards in Construction, 343
 Stochastic Assessment of Timing and Efficiency of Maintenance for Corroding RC Structures, 1612

Spatial data

Comparison of Methods for Defining Geographical Connectivity for Variables of Trip Generation Models, 1743
 Comparison of Optical Sensor-Based Spatial Data Collection Techniques for Civil Infrastructure Modeling, 239

SUBJECT INDEX

Standards and codes

Data Management for Geospatial Vulnerability Assessment of Interdependencies in U.S. Power Generation, 1197

Effects of Controlling Parameters on Performance of a Decision-Rule Map-Matching Algorithm, 1797

Improved Accuracy of Area Objects in a Geographic Information System Based on Helmer's Variance Component Estimation Method, 1677

Probabilistic Approach for Modeling and Presenting Error in Spatial Data, 1687

Spatial distribution

Spatial Patterns of Urban Development from Optimization of Flood Peaks and Imperviousness-Based Measures, 1074

Storm Identification and Tracking Algorithm for Modeling of Rainfall Fields Using 1-h NEXRAD Rainfall Data in Texas, 1104

Specifications

Effect of Specifications Type on the Quality of Paving Contracts in New Brunswick, 351

Integrating Green Specifications in Construction and Overcoming Barriers in Their Use, 1525

Risk-Based Model for Pricing Highway Infrastructure Warranties, 1218

Variable-Amplitude Fatigue Strength of Structural Steel Bridge Details: Review and Simplified Model, 129

Spectral analysis

Dynamic Characterization Test of the New Law Court in Naples, 1456

Performance of Active and Passive Methods for Measuring Low-Frequency Surface Wave Dispersion Curves, 870

Spectral Collocation Model for Solitary Wave Attenuation and Mass Transport over Viscous Mud, 510

Vertical and Radial Consolidation Analysis of Multi-layered Soil Using the Spectral Method, 794

Spillways

Developing Flow Region and Pressure Fluctuations on Steeply Sloping Stepped Spillways, 1030

Generalized Flow Rating Equations at Prototype Gated Spillways, 983

Local Scour Downstream of Positive-Step Stilling Basins, 1005

Seismic Safety Assessment of Gated Spillways, 1478

Skimming Flow in the Non-aerated Region of Stepped Spillways over Embankment Dams, 991

Stepped Spillway with Hydraulic Jumps: Application of a Numerical Model to a Scale Model of a Conceptual Prototype, 985

Turbulence Modeling of Flows over Circular Spillways, 1283

Sprinkler irrigation

Allocation of Flow to Plots in Pressurized Irrigation Distribution Networks: Analysis of the Clément and Galand Method and a New Proposal, 1223

Evaluation of Closed-Loop Site-Specific Irrigation with Wireless Sensor Network, 1226

Improved Pressurized Pipe Network Hydraulic Solver for Applications in Irrigation Systems, 1274

Simplified Method for Sizing Laterals with Two or More Diameters, 1238

Simulation of a Collective Solid-Set Sprinkler Irrigation Controller for Optimum Water Productivity, 1225

St. Lawrence River

Statistical Approach to Model the Deep Draft Ships' Squat in the St. Lawrence Waterway, 1888

Stability

Dynamic Axial-Moment Buckling of Linear Beam Systems by Power Series Stiffness, 507

Energy Dissipation on Block Ramps with Staggered Boulders, 976

Hydrodynamic Stability of a Periodically Unsteady Swirling Jet, 522

In-Plane Load-Deflection Behavior and Buckling of Pressurized Fabric Arches, 1654

Stability Charts for the Collapse of Residual Soil in Karst, 820

Stability of a Pair of Counterrotating and Corotating Vortices of Different Strengths, 485

Stabilization

Development of Specification for Accelerated Approval Process of Flowable Fill Mixtures, 1447

Response Analysis of Field-Scale Fully Grouted Standard Cable Bolts Using a Coupled ANN-FDM Approach, 481

Treatment of Aluminum Plant Hazardous Wastes Containing Fluorides and PAH, 589

Stadiums

Diamond in the Rough, 2002

Game Opener, 2012

Stainless steel

Experimental Investigation of the Interaction of Local and Overall Buckling of Stainless Steel I-Columns, 1656

Modeling of Residual Stresses in Structural Stainless Steel Sections, 1532

Numerical Investigation of the Interaction of Local and Overall Buckling of Stainless Steel I-Columns, 1657

Periodic Overload Corrosion Fatigue of MMFX and Stainless Reinforcing Steels, 1355

Stairs

Prefabricated Steel Stair Performance under Combined Seismic and Gravity Loads, 1540

Slender Monumental Stair Vibration Serviceability, 104

Standardization

Concept-Based Method for Extracting Valid Subsets from an EXPRESS Schema, 235

Evaluation of a Moderate Resolution, Satellite-Based Impervious Surface Map Using an Independent, High-Resolution Validation Data Set, 1069

Standards and codes

Conformable Tire Patch Loading for FRP Composite Bridge Deck, 220

Counteracting Structural Loads: Treatment in ASCE Standard 7-05, 1537

Gust-Front Factor: New Framework for Wind Load Effects on Structures, 1597

Impact of Code Requirements in the Central United States: Seismic Performance Assessment of a Reinforced Concrete Building, 1568

Maximum Shear Strength of RC Beams Retrofitted in Shear with FRP Composites, 195

Performance of Roof Tiles under Simulated Hurricane Impact, 95

Procurement of Design-Build Services: Two-Phase Selection for Highway Projects, 1334

Review of Regulations and Guides for Excavation and Trenches—Comparison with the Québec Safety Code for the Construction Industry, 1980

Seismic Response and Performance of Buckling-Restrained Braced Frames, 8

Standing waves

Full Two-Dimensional Model for Rolling Resistance. II: Viscoelastic Cylinders on Rigid Ground, 429

State-of-the-art reviews

Are Available Models Reliable for Predicting the FRP Contribution to the Shear Resistance of RC Beams?, 215

Recent Advances in Performance Evaluation and Flexural Response of Existing Bridges, 1476
